

IDEAS White Paper V1.0

IDEAS 

A fully decentralized platform for investing, fundraising, and recruitment, that use cryptocurrencies for payments, and accept all kinds of projects.

Our Vision

IDEAS aims to revolutionize fundraising and investing by creating a decentralized platform, accessible to all projects, and functions using cryptocurrencies.

Entrepreneurs with promising startup ideas can share them on the platform, to receive support from investors or donors in the form of cryptocurrency.

For more information, check the [Concept & Vision](#) video on our YouTube channel.

Our Vision

Share you idea

Upload your project, present it to worldwide possible investors.

Invest / Donate

Check all different uploaded projects, invest in a project, or donate to a certain cause.

Win/Win Situation

As an entrepreneur, you'll fund your project and achieve its success, and as an investor, you will make profits.

Tokenomics

IDEAS Token has a fixed total supply equal to 300 Million tokens.
Distributed as follows (After the migration to Ethereum):

Liquidity locked for 5 years (till 2028 able to be extended) – [LINK](#)

Marketing and Budget wallets locked for 12 years (till 2034) – [LINK](#)

[Platform Documentation](#)

What is IDEAS project about ?

IDEAS is a decentralized autonomous application platform, designed to bring together entrepreneurs, investors, and skills in a shared space that operates using cryptocurrencies.

IDEAS aims to revolutionize the way people can fund and invest in projects. We've created an ERC20 token called IDEAS, a decentralized autonomous platform, and a mobile application to achieve this goal.

The IDEAS platform is divided into two sections: the Investment Platform and the Recruitment Platform. The Investment Platform is where users can post their ideas/startups without restrictions or control from IDEAS or any other third party. The Recruitment Platform allows business owners to post job offers, and freelancers from all over the world can apply and bid on paid tasks.

Check our introductory video about the IDEAS platform, What it is, and how it works, [Here](#)

How It Works

What are the utilities of IDEAS ?

IDEAS (IDEAS) is an ERC20 token based on the Ethereum blockchain. It is used for:

- Processing transactions and storing data of the IDEAS platform functions on the Blockchain.
- Governance votes to determine certain functionalities on the IDEAS platform.

The IDEAS Platform allows users to:

- Post their projects to attract potential investors.
- Borrow cryptocurrencies from other users.
- Request donations for their causes or projects.
- Post job assignments to find suitable freelancers.

Note: All transaction fees in IDEAS will be burned automatically, which renders the token deflationary.

How It Works

Is IDEAS a Deflationary Token?

Yes, IDEAS is a deflationary token.

Over 11% of the total supply has already been burned through various events and features.

The IDEAS token is deployed on UniswapV3, which deducts fees in IDEAS for each buy and sell transaction, and these fees will be burned. Additionally, all platform transactions will incur a fee in IDEAS, which will also be automatically burned.

How to buy IDEAS Token? You can check it [Here](#)

How It Works

What makes IDEAS unique ?

IDEAS is creating a fully decentralized platform for crowdfunding, investing, and recruitments.

While other crypto launchpad platforms supports only crypto projects, and publish a project only after review and approval from the team, IDEAS is taking a step further to render the process fully decentralized for anyone to post without examination, and open for all sorts of projects.

How It Works

What is the investment platform ?

The investment platform is a part of the IDEAS Platform, and it will be an active shared space that works on cryptocurrency and brings together Entrepreneurs and investors from all over the world.

This platform will offers three key functionalities:

- The Borrowing Function: In which you can borrow crypto assets from other users to finance your project.
- The Donation Function: In which you can receive donations from other users who believe in your project and want to support its development.
- The Investment Function: In which others can invest in your project, with the aim of generating profits for both parties in the future.

Note that the investment platform is still under construction.

As we make progress and deliver its functionalities, more information on it will be made available to the public.

How It Works

What projects are eligible for posting on the platform?

Aside from projects that involve adult or violent content, any other type of project may be posted.

Initially, the team will be closely monitoring the projects posted on the platform to ensure a safe environment for users.

Until the time when the platform becomes totally controlled by token holders.

How It Works

What kind of background checks will IDEAS perform on entrepreneurs/projects ?

IDEAS investment platform operates in a completely decentralized manner, meaning no background checks will be performed by IDEAS on any entrepreneur or project.

Instead, entrepreneurs are given the opportunity to create their own profiles, which include their ID, CV, skills, recent work, and other pertinent information, to establish trust with investors through the quality of their posted material and presentation.

Each project posted on the platform will also have a designated section where the entrepreneur can showcase their idea/startup in full detail.

This section will allow the entrepreneur to provide a comprehensive overview of their business plan, technical specifications, white paper, and any other crucial information relevant to their project.

The information can be presented in a variety of formats, including text, documents, images, or videos, providing a comprehensive and engaging way for investors to understand the project and its potential.

It is the sole responsibility of the investor to thoroughly verify and validate the information posted by the entrepreneur or project before making any investment decisions.

How It Works

What is the recruitment platform ?

The Recruitment Platform is a part of the IDEAS platform, and it will be an active shared space that works on cryptocurrency and brings together business owners, and freelancers from all over the world.

As a business owner, you can post a job offer for a task to be completed within a specified timeline, while freelancers can apply and bid for the task.

Note that the investment platform is still under construction. As we make progress and deliver its functionalities, more information on it will be made available to the public.

Roadmap

STAGE 1

- Launching the website
- Creating social media profiles
- Deploy IDEAS tokens on Pancakeswap
- Securing liquidity, audit, and lock team wallet

STAGE 2

- Developing and following a marketing strategy
- DOXXING the founders to gain trust of users
- Claiming a listing on CMC & CG etc..
- Deploy Lottery Function
- Release an initial version of the platform

STAGE 3

- Migration to Ethereum
- Investment platform (2023 Q1-Q4)
- Recruitment platform (2024 Q1-Q4)
- Phone application (2024 Q4)
- CEX Listing

STAGE 4

- Partnering with large projects
- Listing on more CEX
- NFT for projects
- More to come later

Team

A diligent team of engineers and developers with over 10 years of experience,
Passionate about giving their best to finish the project.
